**DETAILED ACTION**

***Election/Restrictions***

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-5, drawn to a composition comprising 42-55% by weight protein, 12-20% by weight fat, and 23-42 % by weight carbohydrates, on a dry weight basis.

Group II, claim(s) 6-8, drawn to a method of building muscles during rehabilitation after injury or post injury.

The inventions listed as Groups I-II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: The composition comprising protein, fat, and carbohydrates has been disclosed by WO97/43912, which Applicant has submitted as part of an IDS filed on June 6, 2005. The future intended use of the composition does not hold patentable weight.
